The space created by man - particularity architecture - and its (in)constancy undoubtedly reflect on the perception of ourselves and our identity. Within the context of the rising migration caused either by work, lifestyles or war, the exhibition *(In)constancy of Space - Struggle for Identity* confronts various visions of Dutch and Croatian Contemporary visual artists and brings together both national and globalizing aspects of human identity. At the same time, Amsterdam audience has a chance to see the largest sample of Contemporary Croatian art so far.
